

To acip@cdc.gov:

I have decided not to receive the COVID-19 vaccine, as a way of protesting that the vaccines currently approved for emergency use in the United States were tested using cell lines derived from the bodies of aborted children (i.e., the HEK293 cell line). I choose to only receive vaccines that were NOT developed, produced, or tested using cell lines of illicit origin.

Since it is in the interest of public health to ensure that the greatest number of people are vaccinated, I encourage the Advisory Committee on Immunization Practices to press for the widespread availability of an ethical vaccine for Covid-19.
